Building Manufacturing

Flooring Application

A2S Rinol Rocland

Floor Size 18,000 m²

RCR Systems

 Conductil

RCR Products

Permaban AlphaJoint

Rocland Qualitop Millenium black

Dramix 3D80/60BG

Technical Notes

Jointless Conductil floor, panel 30 x 30 SFRC. After 6 years of intense use (heavy duty), the surface is in perfect condition, with just some local repairs next to steel joints (resin to replace damaged concrete in high traffic areas).

The customer is very satisfied, and will use the same solution for future extension (except with Permaban Signature in high traffic areas).

Even European visitors (from SNOP group and even automotive customers) were impressed by the quality of the floor, giving a good impression for the whole plant.
